

30 April 2024

To whom it concerns,

Texecom and the UK Product Security & Telecommunications Infrastructure (PSTI) Regime

In light of the UK PSTI Act entering into force at the end of April, Texecom has reviewed the scope of the PSTI act and, for those products that are in scope, we have ensured we meet all of the requirements of the act and associated regulations and we have made available statements of compliance against this act as an addendum to our existing UKCA declarations of conformity.

This is only one aspect of many cyber security controls that Texecom employs, and in many cases we go above and beyond the requirements of the applicable legislation to ensure the security of not just the products and services we offer, but most importantly of the thousands of installers and millions of properties and people who trust us each day to protect them.

You can find out more about our cyber security certifications at www.texe.com or by downloading our [Security and Resilience Provisions Whitepaper](#).

On behalf of Texecom Limited,

Alexander Toohie
Compliance Manager
